Aug 6, 2022 Version 1.1.5 - Better User Experience - Better Performance - Bug Fixes I've had this app for a number of months and really didn't find much use for it until yesterday. Since then I've used it numerous times to remove the background of several pictures in order to place an item into another. I just wish I could be a little more precise so I am not including a smidgen of the background with a smaller object such as a straw. I am now seriously considering going for the lifetime option in order to remove the ads. I think this is an option others would offer instead of a monthly subscription. I got this app as one of my first picture editing apps and it is a good app. There really isn't anything wrong with it. The only thing that I would say is majorly wrong with it is that you need to have the premium subscription to be able to upload the pictures. You can still screen shot them but it is just a little bit annoying. The reason why I am rating it only 3 stars is if you compare it to other editing apps. This app is a lot harder to cut pictures with that it looks in the videos. That is also the only feature for it. I would recommend maybe adding some stickers or filters color filters or something like that. Over all though, it's a very well constructed app! This nifty little app lets you change the background of any photo! Wanna pull a prank? Here's an app for you! This app is also wonderful because no ads!! I mean absolutely NO ads!! Yeah, you might have to purchase stuff, but it's things you can go without. I definitely recommend this app for anybody!! And when I said purchasing, it's optional! You don't save to purchase stuff to make the photos cool!! So definitely get this if you like photo editing apps!! Love this app!!
