While Selenium 4 provides direct access to the Chrome DevTools Protocol (CDP), it is highly encouraged that you use the WebDriver Bidi APIs instead.Many browsers provide eÃÃDevToolsÃÃ eÃÃ a set of tools that are integrated with the browser that developers can use to debug web apps and explore the performance of their pages. Below
code snippet demonstrates that.ChromeDriver driver = new ChromeDriver();
DevTools devTools = driver.getDevTools();
devTools.createSession();
devTools.send(Emulation.setGeolocationOverride(Optional.of(52.5043), Optional.of(13.4501), Optional.of(1)));
driver.get(" ");
driver.quit();
