How to change api version in android studio. Android api version names. Android version api list.

Incremental update. This includes the source files for the platform. Dependencies: Android SDK platform tools R22 or higher is necessary. Android 4.4 (API Level 19) For details on the platform changes, see the General Visor of the Kitkat and the Android 4.4 API. The system version 4.0.3. Dependencies: SDK Tools R14 or higher is needed. The version of the system is 4.1.1. Dependencies: The SDK Tools R20 or higher is needed. Initial launching. Initial launch for Android 5.1 (API level 22). Maintenance update. Initial launch for Android wear. This review adds android automotive stubs. This should always be the same as CompiisDK. Dependencies: Android R19 or higher SDK platform tools is needed. Android SDK Tools 24.0.0 or higher is needed. Initial launch for Android 5.0 (API NVEL 21). Android 10 (API Level 29) for details on the platform changes, see Android 10 for developers. Android 2.3.3 (API Level 10) Dependencies: Requires SDK R12 or higher tools. The SDK Tools R12 or higher is recommended. Initial launch for Android 6.0 (API Level 23). Initial launching. For more information, refer to the General Vision of the Android 7.0 API. Liberation of maintenance. Each version of the SDK platform includes the following packages: the Android SDK platform package. Initial launch for Android 7.0 (API Level 24). Dependencies: Requires SDK R10 or higher tools. Android 5.1 (API Level 22) For details on the platform changes, see the Lollipop General Vision and the Android 5.1 API. Dependencies: Android SDK Platform-Tools R20 or higher is needed. (More information) Dependencies: SDK Tools R17 or higher is required. Various system image packages. Incremental update. Android 4.3 (API Level 18) for details on changing Consult Jelly Bean General Vision and Android 4.3 API. Initial launch for Android 7.1 (API Level 25). The review numbers listed below are just for the Android SDK platform package. Dependencies: Requires SDK R11 or higher tools. o Version is 4.4. For more information, refer to the General Visao of the Android 4.4 API. Compiisdk Compiesdkversion The SDK version that your compile application, defined in build.gradle. Android 7.1 (API Level 25) For details on the platform changes, see Android 7.1 for Developers. Android 8.1 (API Level 27) For details on the platform changes, see Android 8.1 for Developers. Dependencies: Android SDK Platform-Tools R23 or higher is needed. Android 13 (Developer Preview) For details on the platform changes, see Android 13 Display documentation. The system version 4.3. Dependencies: Android R18 SDK Platform Tools or higher is needed. Layouts updated in the support library and correct several problems. For more information, refer to the General Visao of the Android 7.1 API. Anyone is welcome to open a problem or request. Android 4.0.3 (API Level 15) Maintenance update. Android 11 (API Level 30) For details on the changes in the platform, see Android documentation 11. Upgraded the rendering library. Dependencies: Android SDK Platform-Tools 25.0.1 or higher is needed. For example, if your Minsdk is 26, this SDK version corresponding to the API 26 and Android 8, so that your application works only on devices with Android 8 or higher. Variable definition build.version.sdk int The SDK version of the Android operating system is currently running on the user's device. The version of the system is 4.2.2. Dependencies: SDK Tools R21 or higher is needed. Android 4.2 (API Level 17) For details on the platform changes, see the General Vision of Jelly Bean and the Android 4.2 API. Targetsdk targetsdkversion The SDK version that your target application, set in Build.Gradle. Maintenance update. Android 4.0 Level 14) Maintenance update. Each form factor can offer variations to match your computer's processor architecture (such as Intel X86 and EABI arm). For more information, refer to the General Visao of the Android 5.1 API. Level 18 Android 4.3 JellyBean\_MR2 Jelly Bean # 17 Android Android JellyBean\_MR1 2012 Level 16 Android 4.1 JellyBean Level 15 Android 4.0.3 Å ç à € ~4.0.4 JetPack / AndroidX Libraries requires a 14 or higher minsdk. Android 3.0 (API Level 11) Dependencies: Requires SDK R12 or higher tools. Released to the stable channel (no longer on the premise -visualization). Dependencies: Requires SDK R9 or higher tools. Android 2.3 (API Level 9) Dependencies: Requires SDK R8 or higher tools. Android 9 (API Level 28) For details on the platform changes, see Android 9 for developers. Android 3.2 (API Level 13) Initial launching. This is required to compile your application for this version. Android SDK Tools 23.0.5 or higher is needed. Dependencies: Android SDK platform tools R21 or higher is necessary. IMPORTANT: To view the latest Android system components on Android SDK Manager, you must first update SDK tools for the latest release and restart the SDK manager. It also unlocks several editor features that were added in ADT 12. Android SDK Build-Tools 25.0.0 or higher is required. Android Studio uses this SDK version to build your AABs and APKs. This should always be the same as the targetsdk. Android 3.1 (API Level 12) Dependencies: Requires SDK R12 or higher tools. The version of the system is 4.4.2. For more information, refer to the General Visao of the Android 4.4 API. Android SDK Tools 22.3 or higher is recommended. Dependencies: Android SDK Platform-Tools 25.0.0 or higher is required. Android 5.0 (API Level 21) For details on the platform changes, see the Lollipop General Vision and the Android 5.0 API. For example, on a device running Android 11, this value will be 30 (aka build.version.codes.r), even if the target and compile the SDK of the is different. This is a general vision of all android versions and their corresponding identifiers for Android developers. Android 12 (API Levels 31, 32) 12L Drop (API Level 32) for details on Platform changes, see the 12L documentation. System images labeled as Google APIs include access to Google Play and labeled services on Google Play also include Google Play Store. Android 12 (API Level 31) for details on the platform changes, see Android 12 documentation. Released as the final Android 7.1.1 (no more on the premium ). The version of the system is 4.2. Dependencies: The SDK Tools R20 or higher is needed. The version of the system is 4.1.2. Dependencies: The SDK Tools R20 or higher is needed. For more information, refer to the Android 5.0 API General Vision. Android 4.1 (API Level 16) For details on the platform changes, see the Jelly Bean and Android 4.1 API General Vision. Android 3 Level 13 Android 3.1 Honeycomb\_mr2 Honeycomb\_mr1 Level 11 Android 3.1 Android 3.0 Android 3.3 Android 2.3.3 Gingerbread\_MR1 Gingerbread\_9 Android 2.3.0 Å ç à € ~2.3.2 Gingerbread 2010 Level 8 Android 2.1 ECLAIR\_MR1 ECLAIR\_0\_0\_1 ECLAIR\_0\_0\_1 ECLAIR\_0\_1 ECLAIR\_0\_1 ECLAIR\_0\_1 ECLAIR\_0\_1 ECLAIR\_DROID # # # # 1 Android 1.5 Android 1.5 Cupcake Cupcake Level 2 Android 1.1 Base\_1\_1 Petit Four) None 2008 Kotlin Variavel Groovy Varia Definition Minsdk Minsdkversion The SDK's minimum version Your application will support, defined in Build.Gradle. Android 6.0 (API Level 23) for details on the platform changes, see Changes Android 6.0 and APIs of Android 6.0. Fixed errors in the layout rendering library used by Android Studio. Depends: Android SDK platform tools R24 or higher is required. Launched as Android 7.1.1 Develops Pain Preview 2. Notes: Fixes a problem with the rendering library of the visual layout editor that prevented Android 3.1 from execution in ADT. System images can receive separate, usually to resolve the bugs with the emulator. The version version is 4.1.0. Dependencies: The SDK Tools R20 or higher is needed. Android SDK tools. SDK, or higher is recommended. For more information, refer to the General Vision of the Android 6.0 API. Launched as Android 7.1 Preview 1. Notes: Improvements in the platform rendering library to support the Visual Layout Editor in the ADT Eclipse plugin. Android 8 Level 27 Android 8.1 o\_mr1 Oreo 87.0% 2017 87.0% 2017 26 Android 8.0 o 89.7% Android 7 Level 25 Android 91.3% 2016 Level 24 Android 7.0 N 94.1% Android 6 Lollipop 23 M Marshmallow 96.8% 2015 Android 5 Lollipop\_mr1 5.1 Lollipop\_mr1 Lollipop 98.5% 2015 NVEL 21 Android 5.0 Lollipop, L No 2014 JetPack Compon requires a MinsDK of 21 or higher. Build.Version Codes Official Reference Codenames, Tags and Construction Numors This page provides launching information about the SDK packages available for download in SDK Manager, on the SDK Platforms tab. Android 7.0 (API Level 24) For details on the platform changes, see Android 7.0 for developers. The version of the system is 4.0.4. Note: This system image includes support for acceleration of emulator hardware graphics when used with SDK R17 or higher tools. Android SDK Build-Tools 25.0.1 or higher is needed. At least one of them is required to run this version on the Android emulator. Android Studio can show code lines of these files while you deparate your application. Android SDK Tools 24.3.4 or higher is needed. Android SDK Tools 23.0 or higher is needed. The version of the system is 4.0.2. Dependencies: SDK Tools R14 or higher is needed. The fonts for the Android package. This review allows more drawing features in ADT and corrects several bugs in the previous rendering library. Android 4 Level 20 Android 4.4W 5 KITKAT\_WATCH KITKAT Level 19 Android 4.4 KITKAT 2013 Google Play Services Do not support Android versions below the level API 19. Happy development!
